WHAT IS THIS PRODUCT?

Type: Open-Ended Money Market Fund

Term: Indeterminate duration

Reference currency: USD

Objectives:

The Fund will seek to provide unitholders with an investment, directly or indirectly expressed in US dollars (USD) with low volatility and a stable level of potential profitability above the alternatives offered by traditional banking investments.

Investment policy: The Fund may invest in:

- Bank deposits, all denominated in US dollars, provided that they are repayable upon request at any time and provided that they mature within a maximum of 12 months;
- Bank deposits and money market instruments such as commercial paper, short-term public debt securities, namely treasury bills, fixed-rate bonds, with a residual maturity of less than 397 days, and other debt instruments of an equivalent nature, issued by private entities or issued or guaranteed by an EU Member State, or by international public bodies;
- Units denominated in US dollars in money market UCITS, which invest exclusively in assets denominated in US dollars or which systematically hedge foreign exchange risk, provided that the investment in UCIs does not exceed 10% of the NAV;
- Derivative financial instruments to hedge interest rate or foreign exchange risks;
- The UCI may invest up to 100% of its assets in money market instruments issued or guaranteed by sovereign governments of OECD member states, supranational entities, including the most prominent instruments issued or guaranteed by the government of the United States and its agencies and related entities, including but not limited to the United States Treasury, the United States Federal Reserve, the FNMA (Federal National Mortgage Association), the GNMA (Government National Mortgage Association), Freddie Mac (Federal Home Loan Mortgage Corporation), and supranational organizations where the United States or at least one European Union Member State takes part in, namely the International Bank for Reconstruction and Development (IBRD or World Bank), the IFC (International Finance Corporation), and the IADB (InterAmerican Development Bank).

The Fund does not seek preferential exposure to any specific country or activity sector.

The Fund's investment strategy is based on active management and does not take any benchmarks into account. The assets are selected essentially on the basis of their return potential in relation to the quality of the issuers and the macroeconomic context in which they operate, favoring companies that adopt best practices in terms of Government, Human Rights and the Environment in the universe of issuers, and refraining from investing in entities whose majority of revenues come from activities in controversial sectors, namely gambling, controversial weapons, tobacco and thermal coal.

Benchmark: The Fund is not referenced to any money or capital market index.

Dealing frequency: The unit value of the Fund is calculated and published on a daily basis. Unitholders may subscribe or redeem units on any business day in accordance with the Portuguese banking calendar. The minimum subscription amount is USD 100.000.
