Investment Objectives

The Fund seeks to provide capital preservation and returns in line with the yield's dynamics of Euro Zone's money markets and fixed income markets, investing mostly in short term and low volatility financial instruments.

Investor Profile

The Fund is suitable for retail and institutional investors aiming to preserve capital and manage cash, being willing to tolerate sporadic investment losses consistent with financial markets' dynamics.

Manager comments

In April, the US started a trade war, with Trump announcing reciprocal tariffs that were more severe than anticipated, raising fears of recession. China was the main target, with both countries applying tariffs of more than 100% on mutual goods. The tension caused strong volatility in treasuries, prompting Trump to suspend tariffs for 90 days for countries that did not retaliate. The instability only eased when the president assured that he would keep Powell in office and signaled that he wanted to reach an agreement with China. As for economic data, the US GDP figures in 1Q25 showed a contraction of 0.3%, but March inflation came lower than expected. In Europe, the ECB cut rates as expected. With doubts about the role of Treasuries as a safe-haven asset, European bonds outperformed American ones: 10-year bunds fell 29bp, against 4bp in the US. In credit, spreads widened, with emphasis on high yield (+35bp).

What helped the Fund:

Medium-term fixed-rate securities and duration management.

What harmed the Fund:

Money market instruments.

Perspectives for the Fund:

Uncertain impact of tariffs on inflation could change monetary policy.
