ISIN: PTIGAVHM0006

Cash settlement: Available on the 4th day after redemption request

Income Policy: Distribution

Management Company: IM Gestão de Ativos - Sociedade Gestora de Organismos de Investimento Coletivo, S.A.

Investment Objectives

The Fund will seek to provide participants with a level of profitability and stability that keeps pace with money market interest rates, by investing in securities and financial instruments, predominantly medium and long term, whose yield rates depend on the Eurozone markets' short interest rates. The Fund will mainly invest in variable rate bonds, mortgage bonds and other debt instruments of an equivalent nature, expressed in euros, issued by entities whose credit quality is rated equivalent to the upper echelons of rating agencies.

Investor Profile

The Fund is suited to conservative Customers in the face of risk, who prefer low price volatility and reduced probability of devaluation of their capital. The return on investment is expected to be stable and close to the interest rates of the money markets, so the Fund can be seen as an alternative to traditional investments of identical risk, provided that the client assumes uncertainty about the future return of the Fund, or that is, provided you waive a guaranteed rate.

Manager comments

In April, the US started a trade war, with Trump announcing reciprocal tariffs that were more severe than anticipated, raising fears of recession. China was the main target, with both countries applying tariffs of more than 100% on mutual goods. The tension caused strong volatility in treasuries, prompting Trump to suspend tariffs for 90 days for countries that did not retaliate. The instability only eased when the president assured that he would keep Powell in office and signaled that he wanted to reach an agreement with China. As for economic data, the US GDP figures in 1Q25 showed a contraction of 0.3%, but March inflation came lower than expected. In Europe, the ECB cut rates as expected. With doubts about the role of Treasuries as a safe-haven asset, European bonds outperformed American ones: 10-year bonds fell 29bp, against 4bp in the US. In credit, spreads widened, with emphasis on high yield (+35bp).

What helped the Fund:

Fixed-rate debt, duration management and exposure to AT1.

What harmed the Fund:

Hybrid debt, Floaters.

Perspectives for the Fund:

Uncertain impact of tariffs on inflation could change monetary policy.

The published returns represent past data, and do not constitute a guarantee of future profitability. The reference periods considered are the last quotation date and the quotation on the same date in the previous 12 months, 3 and 5 years. Annualized returns would only be obtained if the investment was made and maintained throughout the reference period. For the purpose of calculating returns, redemption fees are not taken into account, when applicable, and are net of all other fees. The value of the units may increase or decrease depending on the level of risk that varies between 1 (minimum risk) and 7 (maximum risk).

Note: Since January 1st, 2023, with the implementation of the PRIIPS Regulation, the Summary Risk Indicator (SRI) replaced the Summary Risk and Remuneration Indicator (SRI) as the Funds' risk indicator.

Investment in funds may result in the loss of invested capital if the fund is not guaranteed capital. The tax regime for investment funds was changed as of July 1, 2015, whereby the figures disclosed until June 30, 2015 are deducted from the tax then borne by the fund but do not take into account the tax that may be due by the Participants in relation income earned in the period after that date. Investing in the funds does not dispense with reading the Basic Investor and Prospectus Information, available on this website, at www.cmv.pt and on the respective distributor website, before making the decision investment. For any additional information, contact us at 21 120 91 00, Monday to Friday from 9:00 am to 6:00 pm.
