Investment Objectives

The Fund will seek to provide participants with a medium/long term level of return with a premium on money market instruments, through balanced investment in investment funds of diverse characteristics in terms of asset classes, financial instruments, geographic areas and currencies investment. The Fund will invest at least 2/3 of its total net value in units of other investment funds, including investment funds admitted to trading on regulated markets, namely ETF (Exchange Traded Funds) or other similar funds. The Fund, which tends to be invested in a balanced manner between shares and bonds, will try not to exceed the following maximum limits as a percentage of its global net value: Shares 66%; Fixed rate bonds 70%.

Investor Profile

Being of medium high risk, the Fund is suitable for Customers who are less conservative in terms of risk, but who want to increase the value of their investments in the medium/long term and with a wide diversification of their applications of their applications. The Fund is intended for clients willing to invest for a period of more than 4 years.

Manager comments

April was a very volatile month, marked by a very negative start, with great risk aversion after the announcement of the "reciprocal" tariffs, but followed by some recovery, with the 90-day delay of the application of these tariffs, except for China, for bilateral negotiations and a softening of rhetoric with China. The ECB once again cut interest rates by 0.25%, while regarding economic indicators we should highlight the 0.3% contraction in US GDP in the 1st quarter, impacted by a very significant increase in imports. In the Eurozone, GDP grew by 0.4%, while in China it grew by 1.2%. During the month, the 10-year interest rate in Germany fell 0.29% to 2.44%, while in the US it fell 0.04% to 4.16%. Credit spreads widened and stock markets fell.

What helped the Fund:

Government and corporate debt, and alternatives

What harmed the Fund:

Equity

Perspectives for the Fund:

Volatility is likely to continue, with the most pressing issue being how much tariffs can actually fall and what the economic damage will be. Another issue that should have an impact is the tax cuts to be announced in the US, as well as the fiscal stimulus in China. Although the likelihood of recession in the US has increased, fiscal and monetary support at the global level should make it possible to avoid this scenario, bringing some normality to the markets.
