### Investment Objectives

The Fund will essentially invest in public and private debt bonds, fixed interest rate and indexed interest rate, issued by entities whose credit quality has, at the time of its acquisition by the Fund, rating ratings equivalent to the upper echelons (investment grade) rating agencies. The Fund may invest a maximum of 35% of its assets in shares, convertible bonds or which grant the right to subscribe for shares, or by any other instruments which grant the right to its subscription, or which allow exposure to the stock markets, namely warrants and stakes in collective investment institutions whose investment policy consists mainly of shares.

### Investor Profile

The Fund is suitable for investors with reduced risk tolerance (liquidity, security and equity stability), whose objective is to channel savings in a long-term perspective, to cover education expenses, or as a retirement supplement, with a period minimum of 5 years, enjoying attractive tax savings.

### Manager comments

April was a very volatile month, marked by a very negative start, with great risk aversion after the announcement of the "reciprocal" tariffs, but followed by some recovery, with the 90-day delay of the application of these tariffs, except for China, for bilateral negotiations and a softening of rhetoric with China. The ECB once again cut interest rates by 0.25%, while regarding economic indicators we should highlight the 0.3% contraction in US GDP in the 1st quarter, impacted by a very significant increase in imports. In the Eurozone, GDP grew by 0.4%, while in China it grew by 1.2%. During the month, the 10-year interest rate in Germany fell 0.29% to 2.44%, while in the US it fell 0.04% to 4.16%. Credit spreads widened and stock markets fell.

#### What helped the Fund:

Government and corporate debt, and alternatives

#### What harmed the Fund:

Equity

#### Perspectives for the Fund:

Volatility is likely to continue, with the most pressing issue being how much tariffs can actually fall and what the economic damage will be. Another issue that should have an impact is the tax cuts to be announced in the US, as well as the fiscal stimulus in China. Although the likelihood of recession in the US has increased, fiscal and monetary support at the global level should make it possible to avoid this scenario, bringing some normality to the markets.
