Investment Objectives

The Fund shall predominately invest in listed securities of companies headquartered in the European Union, United Kingdom, Norway, Switzerland,

and complementarily, in companies of other developed international markets.

The Fund must permanently have a minimum of 85% of its global net value invested in Equity.

Investor Profile

The FUND is adequate for customers with tolerance to support eventual devaluations of short-term capital, as well as investors with a stable asset situation, that aim to collect profitability provided by European Union, Swiss and Norwegian stock markets. It is also suitable to investors that aim to create diversified investment portfolios, on an european scale.

The minimum recommended investment period is 3 years. The likelihood of capital losses decreases the longer the investment duration is.

Unit Classes A and R are adequate for non-professional investors, professional investors and eligible counterparties.

Unit Class I is exclusively for professional investors and eligible counterparties.

Manager comments

European markets appreciated in May, but with large discrepancies between the respective national markets. The Southern European markets were collectively the stars of the month, benefiting from the relative weight of financial sectors, especially banking - Italy, Spain and Portugal rose by 8.5%, 6.6% and 8.1% respectively. On the other hand, the Swiss market lagged behind, gaining only 1.3 per cent, due to the weight of defensive sectors such as Pharmaceuticals, which led the monthly losses. The MSCI Europe index rose 5.4%, lagging behind the 6.4% and 6% rises of the S&P500 and MSCI World indices in euros.

What helped the Fund:

Selection in the Banking sector (Erste Group, Commerzbank) and Consumer Durables (Pandora).

What harmed the Fund:

Liquidity and underweighting in the Automobile and Transport sectors.

Perspectives for the Fund:

The Fund has a bias towards companies with sustained growth, combined with more defensive companies.

The published returns represent past data, and do not constitute a guarantee of future profitability. The reference periods considered are the last quotation date and the quotation on the same date in the previous 12 months, 3 and 5 years. Annualized returns would only be obtained if the investment was made and maintained throughout the reference period. For the purpose of calculating returns, redemption fees are not taken into account, when applicable, and are net of all other fees. The value of the units may increase or decrease depending on the level of risk that varies between 1 (minimum risk) and 7 (maximum risk).

Note: Since January 1st, 2023, with the implementation of the PRIIPS Regulation, the Summary Risk Indicator (SRI) replaced the Summary Risk and Remuneration Indicator (SRI) as the Funds' risk indicator.

Investment in funds may result in the loss of invested capital if the fund is not guaranteed capital. The tax regime for investment funds was changed as of July 1, 2015, whereby the figures disclosed until June 30, 2015 are deducted from the tax then borne by the fund but do not take into account the tax that may be due by the Participants in relation income earned in the period after that date. Investing in the funds does not dispense with reading the Basic Investor and Prospectus Information, available on this website, at www.cmvm.pt and on the respective distributor website, before making the decision investment.
