WHAT IS THIS PRODUCT?

Type: Open-Ended Flexible Fund

Term: Indeterminate duration

Reference currency: Euro

Objectives:

The Fund aims to provide unitholders with a diversified portfolio of financial instruments, seeking to maximise their return through flexible management. It seeks to provide a level of return of 2.5% on money market instruments, in sequential periods of 3 years. The Fund will diversify the financial investments in which it may invest to ensure an adequate spread of risks.

Investment policy: The Fund will invest in assets listed on OECD markets except UCI Units and bank deposits.

The Fund may invest in equities, bonds, certificates, ETFs (Exchange Traded Funds), ETCs (Exchange Traded Commodities), units of other funds, bank deposits, financial derivative instruments as well as other money market instruments as defined in the Prospectus.

The Fund will pursue an active investment strategy, considering only the Euribor 12-month rate plus 2.5% as a reference to measure its performance. The entity responsible for management will prioritize diversification of investments between fixed income and variable and active management of the allocation by asset classes, based on market conditions and the correlation between the market value evolution of the securities that make up the UCI's portfolio, to control and reduce investment risk and maximize the UCI's asset, favouring entities that adopt best practices in terms of Governance, Human Rights, and Environment within the investment universe.

The Fund has a flexible investment policy, and any of the above types of financial instruments may vary without any limits other than those set out in the Fund's prospectus, with no minimum or maximum limits per category of asset, being the responsibility of the management company to determine at any given time, in line with market conditions, the composition of the assets most appropriate to the pursuit of the Fund's objective and its risk profile. The Fund does not seek preferential exposure to any specific activity sector.

The Fund may use financial derivative instruments for risk hedging purposes or additional exposure, without resulting in an exposure to the underlying asset higher than 100% of its net asset value.

Benchmark: The market benchmark for the performance of the Fund is 12-month Euribor plus 2.5%. The Fund manager manages the portfolio on a discretionary basis and is not limited to investing in accordance with the above-mentioned parameter.

Dealing frequency: The unit value of the Fund is calculated and published daily. Unitholders may subscribe or redeem units on any business day in accordance with the Portuguese banking calendar. The unit value for subscription or redemptions is the unit value that will be determined at the end of the day on which the request is submitted, so it is made at an unknown price. The minimum subscription amount is 250€.

Redemption notice period: 5 business days.

Distribution policy: Because it is a capitalisation Fund, the income generated by the Fund's portfolio is reinvested in the Fund.

Depository: Banco Comercial Português, S.A., headquartered at Praça D. João I, 28, 4049-060 Porto, Tel.: +351 220 040 000
