IMGA Poupança PPR/OICVM - Open-Ended Retirement Savings Investment Fund

Share Class A (ISIN PTYAIVLM0008)

Share Class R (ISIN PTIG1AHM0006)

Harmonized Fund managed by IM Gestão de Ativos - Managing Company of Collective Investment Entities, S.A., held by CIMD Group.

Objectives and investment policy

Objectives

The Fund aims to provide investors, in a long-term perspective, with the appreciation of capital with a view to setting up a retirement top-up, seeking to maximise future well-being.

Investment Policy

The Fund, by adopting a global investment policy, invests predominantly in regulated markets and the respective trading platforms of member states of the European Union or of the OECD.

The Fund will primarily invest in public and private debt bonds with fixed interest rate and indexed interest rates, issued by entities with a credit quality at the time of their acquisition by the fund equivalent to the higher brackets (investment grade) of the rating agencies.

The Fund may also invest in units of collective investment institutions in which the investment policy focuses on bonds, including investment in funds managed by IM Gestão de Ativos - Managing Company of Collective Investment Entities, S.A.

The Fund may invest up to 35% of its assets in equity, convertible bonds or instruments which confer a right to subscribe equity, or in any other instruments that ensure the right to subscription, or permit exposure to stock markets, such as warrants and units in collective investment undertakings whose investment policy is mainly focused on shares. Investing in shares through warrants contributes to the above-stated limit.

The funds in which this Fund invests have a maximum management fee of 2,5%. For liquidity management purposes and up to a 20% ceiling, the fund may invest in short-term debt instruments, bank deposits and other monetary instruments.

The Fund may use derivative financial instruments and techniques, either for risk hedging purposes, or in order to pursue other adequate management goals of the fund's assets, within the legal limits.

The Fund may be exposed to currency risk up to a maximum of 25% of its net asset value.

The Fund does not seek any preferential exposure to a country or sector of activity.

Reference currency

Euro.

Benchmark

The Fund is not pegged to any money or capital market index.

Dealing frequency

The value of the investment unit is calculated and published daily. Investors may subscribe to or redeem units on any business day in accordance with the Portuguese banking calendar.

For purposes of subscription or redemption, the value of the subscribed/redeemed unit is determined at the close of the day on which the order was placed. Therefore, the order is executed at an unknown price.

Share Classes A and R: They are intended for retail and professional investors, as well as eligible counterparties. The minimum subscription amount 100€ and 200€ respectively.

Redemption notice period: 4 business days

Investor Profile

In view of the specific legal scheme of this type of Fund, this investment is intended for investors with a long-term perspective for the appreciation of their savings. The Fund is appropriate for investors with some risk tolerance (liquidity, safety, and asset stability). It is for investors with the aim of channelling savings in a long-term perspective, as a complement to their retirement, for a minimum period of 5 years. It also provides more advantageous taxation on redemption, under the conditions set forth in the law.

Distribution policy

Because it is a capitalisation Fund, the income generated/yielded by the Fund's portfolio is reinvested in the Fund.

Minimum recommended investment period

The recommended minimum investment period is 5 years.

Recommendation

This Fund may not be suitable for investors wishing to withdraw their money within 5 years after investing.

Risk and reward profile

Synthetic risk indicator

The shaded area of the scale below shows the Fund's risk rating, calculated based on historical data.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The historical data used for the calculation are not a reliable indicator of the Fund's future risk profile.

The risk category indicated is not guaranteed and may vary over time. The lowest category does not mean the investment is without risk.

The Fund's rating reflects the fact that it primarily invests in shares and bonds, so it does not offer a fixed or guaranteed return. The investor is exposed to the various risks mentioned below, which may involve a risk of capital loss, i.e. investors may not recover the full value of their original investment.

Description of materially relevant risks:

Credit Risk

The Fund is exposed to credit risk arising from the sensitivity of asset prices to fluctuations in the probability of the issuer of a security being unable to meet its interest and principal payment obligations in due time.

Interest Rate Risk

The Fund is exposed to the interest rate risk arising from the change in the price of fixed-rate bonds due to fluctuations in market interest rates.

Market Risk

The Fund is exposed to market risk arising from changes in the value of shares on the basis of the prices that form at each moment in the markets on which they are traded.

Exchange Rate Risk

The Fund may invest in financial instruments denominated in currencies other than the Euro. As a result, it is exposed to the risk associated with the loss of value of such investments due to depreciation of the currency in which the financial instrument is denominated, compared with the Euro.

Liquidity Risk

The Fund may find it difficult to value or meet high-volume redemption requests if some of its investments become illiquid or do not permit their sale at fair prices.

Counterparty Risk

The Fund is exposed to counterparty risk arising from the possibility of the counterparty in a transaction becoming unable to meet its commitments to deliver the financial instrument or monetary values on the settlement date, forcing the transaction to be concluded at a price different from that agreed.

Operational Risk

The Fund is exposed to the risk of losses resulting, in particular, from human error or system failures or incorrect valuation of the underlying securities.

Impact of management techniques and instruments:

The Fund envisages the use of derivative financial instruments that can lead to an expansion of gains or losses resulting from the leverage effect of the investments.

Charges

The charges borne by the investor are used to cover the operating costs of the Fund, including marketing and distribution costs. These charges reduce the investment's growth potential.

See the Fund's prospectus, available at www.imga.pt, for more information on charges.

Past performance (Share Class A)

Past performance is not a reliable indicator of future performance and may not be repeated because the value of investments may rise or fall. The chart shows the Fund's annual performance in Euros for each full calendar year over the period covered by the chart. It is expressed as a percentage change in the Fund's net asset value at the end of each year. It includes all charges except subscription and redemption charges. The Fund changed its investment policy on the 27th of August, 2018.

The values disclosed do not take into account income tax due for redemption of units.

The Fund was established on the 5th of May, 2003.

No data for Share Class R is disclosed due to it not having yet completed one full civil year.
