# Management Report

# **Introductory Note**

The Fund was established on 17 January 2000 as an Open-Ended Equity Investment Fund.

On October 23, 2000, Fundo Mello Ações EUA was merged by incorporation into Fundo AF América.

On 31 March 2005 its name was changed to Millennium Ações América.

On 16 November 2015, it was renamed IMGA Ações América, in line with the name change of all the funds managed by IMGA following the acquisition of Millennium Gestão de Ativos from Millennium Bcp.

As of 28 November 2019, Category I of Shares in this Fund became available for sale, which was constituted on 14 February 2022.

As of 1 April 2021, Category R of Shares in this Fund became available for sale, which was constituted on 3 May 2021.

# **Overview of Market Evolution**

After the fastest and sharpest rise in the key rates of central banks of developed economies since the beginning of the 1980s, economic expectations at the start of the year for 2023 were globally unfavorable. These were based on the historically depressed levels of the main confidence indicators, as well as on the signals of several metrics capable of indicating the future trajectory of the economic cycle.

In fact, the contrast between these projections of a drop in global economic activity in 2023 and the economic performance recorded over the 1st half of the year was extreme, which was based on several explanatory factors.

After reaching peaks since mid-2014 in the summer of 2022, raw material prices have fallen significantly since the 3rd quarter of 2022. This movement was led by the correction of the energy basket, with the respective prices remaining surprisingly pressured throughout of the 1st half of 2023. More specifically, the drop of more than 50% in the price of natural gas in the Euro Area between August and the beginning of December 2022 and the subsequent devaluation of almost 80% until June 2023 led this raw material to its lowest price since June 2021, that is, below the pre-Ukrainian war level. The correction minimized the economic impact on the most energy-intensive sectors and contributed to the decline in inflation in the period under review.

Secondly, after two and a half years of restrictive pandemic policies and mainly after the re-election and strengthening of Xi Jinping's influence in the leadership of the Chinese Communist Party, there was a radical change in the Chinese executive's stance. The removal of pandemic restrictions happened much faster than expected, which guaranteed a very significant economic recovery in the first months of 2023.

Thirdly, a set of factors associated with the postpandemic legacy continued to support economic activity levels. From an expenditure perspective, the use of excess savings accumulated during the pandemic period, together with the suppression of savings rates, guaranteed continuity consumption patterns, even in the face of significant drops in real disposable income levels. On the other hand, increases in corporate profit margins, as a result of high levels of demand and scarcity of supply, simultaneously made it possible to maintain employment levels at historic highs and support investment.

Finally, from the point of view of supply, after historically low inventory levels were reached at the end of 2022, the normalization of the functioning of supply chains contributed to the recovery of economic activity in some sectors, with emphasis on industry and in particular the automotive sector.

The described framework allowed for a progressive recovery of confidence indices and only a stagnation of European activity in the 1st quarter (after -0.1% in the 4th quarter of 2022), "benefiting" from the positive contribution of net exports (fall in imports higher than that of exports) and by the expansion of investment. Conversely, private consumption again contributed negatively to economic activity in the first quarter of the year. Despite the weakness of most confidence/activity indicators between April and June and the vulnerability of the German economy, GDP in the Euro Area grew by 0.3% in the 2nd quarter of 2023.

The level of economic activity in the USA also exceeded expectations, with an annualized growth of 2%, which had a decisive contribution from private consumption (+4.2%), as well as from net exports, which more than compensated the negative contributions of the inventory and residential investment components. The quarter-

on-quarter expansion in the 2nd quarter of the year was 2.3%.

Among the main economic blocs, the biggest highlight was China, which, as a result of the faster abandonment of its zero-Covid policy, saw a quarter-on-quarter growth of 2.2% in the 1st quarter of the year. Despite the more favorable performance in this period, the trajectory of most confidence and activity indicators was moderate, which, combined with the reluctance to announce more significant and comprehensive stimuli, meant a realignment of expectations to an increase below the historical average in the 2nd quarter of 2023.

The framework just described justified practically widespread upward revisions of economic growth estimates and contributed to the valuation profile of risk assets. However, financial markets were not conditioned solely by economic dynamics.

The period under review was also marked by the crisis in the banking sector and the bankruptcy of three regional banks in the USA, a situation with shock waves in Europe, whose crisis of confidence led to the resolution of Credit Suisse. Although the proportionate and rapid response of regulators, and in particular the US Federal Reserve, has minimized the escalation of the crisis, its full implications are still unknown and add to the impact of interest rate rises and the deterioration of the conditions for granting credit already in progress before these events. The first half of 2023 was also marked by the deterioration of the geopolitical climate, particularly between the USA and China.

After capturing investors' attention in 2022, inflation remained somewhat under pressure on a global scale in the first months of 2023, having since begun a downward trajectory, as a result of the normalization of the functioning of supply chains and the fall in the price of raw materials. However, the resilient economic dynamics and the solidity of the labor market meant increases and risks of greater persistence of inflation in the

services sector and, more generally, of underlying inflation.

Despite the adoption of a less aggressive stance by the main central banks, through smaller increases in their respective policy rates, the bias continued to be towards the greater restrictiveness of monetary policies in the last forty years.

The rhetoric of the main central banks evolved, throughout the first half of 2023, in line with the evidence of greater solidity in economic dynamics and mainly with the tendentially more persistent nature of inflation. Therefore, expectations of key rate increases by the US Federal Reserve, the ECB and the Bank of England, among others, underwent somewhat significant increases in the 1st quarter.

Although the crisis of confidence in the US banking sector radically altered the expectations with regard to the main central banks' actions, they have resumed their upward trajectory since then, approaching their original level as the risks of recession in the short term and of financial instability receded.

Despite the perspectives of more restrictive economic policies, the performance of the main asset classes was largely contrasting with that of 2022.

Sovereign interest rates recorded a differentiated evolution along the yield curve, with increases in real rates of shorter maturities, as a result of the continuation of the cycle of rising short-term reference rates, but falls in sovereign interest rates of longer maturities, due to the slackening of medium/long-term inflationary expectations in the case of the USA and of real rates in the case of Europe. The US and German nominal rates with a 10 year maturity evolved over the first half of 2023 at the highest levels since 2010 and 2011, respectively. The performance of the European periphery was globally positive, with narrowing of spreads vis-à-vis Germany, with emphasis on the drop of practically 100bp in the Greek rate differential, following the success of the implemented economic policies and the prospects of a rating upgrade to investment grade. Italy and Portugal were also highlighted on the positive side, with contractions of 64 and 46bp.

Despite expectations of deterioration in corporate fundamentals, including the impacts of the decline of demand and the rise in interest rates on the default profile, in this front we also witnessed greater than expected resilience, justified by the still high levels of demand and by the ability to pass on increased costs to the final consumer and even achieve an increase in operating margins. As such, despite the somewhat volatile evolution over the period under review, credit spreads registered sweeping contractions, both in the US and in Europe, and more expressive in segments of lower credit quality. The exception was the subordinated financial debt segment, as a result of the higher risk premium demanded following the sector's confidence crisis.

Still within the scope of fixed income, the propensity for risky assets, the stabilization of the dollar, lower interest rates and the more constructive economic prospects for China contributed positively to the performance of emerging market debt, both corporate and sovereign, with the local currency debt subsegment at the forefront in the 1st half of 2023.

The described environment proved favorable for equity markets. The stronger than expected corporate results, the upward revisions of projections for future corporate results and mainly the expansion of multiples, reflecting the environment of economic optimism and more positive investor sentiment, fostered the best performance in the class. The high expectations surrounding investment in "artificial intelligence" contributed to the strong valuations of the securities most exposed to this theme, as well as more generally to the appetite for risk. On the other hand, the reopening of the Japanese economy, greater optimism for the growth of corporate results in this geography and mainly the devaluation of the Japanese currency contributed

to the strong appreciation of Japanese indices in the 1st half of the year.

In foreign exchange markets, the European single currency maintained its upward trajectory, after reaching multi-year lows in August 2022, reflecting greater economic optimism and the more proactive stance of the European Central Bank in response to excessive levels of inflation in the region. In individual terms, emphasis should be given to the appreciation against the US dollar (1.9%), the Nordic currencies (Norwegian and Swedish kroner), the yuan and the yen, and to the losses against the British pound and the Swiss franc. In aggregate terms, the dollar showed high volatility and ended the semester devaluing marginally, with emphasis on gains against the yen and against the yuan. The basket representing emerging market currencies depreciated 1.6% against the dollar in the 1st half of 2023.

The class of raw materials was negatively highlighted in the first six months of the year. Despite the climate of geopolitical tension, with the war in Ukraine at its peak, the index representing the class devalued around 10%. Notwithstanding macroeconomic resilience on a global scale and the reopening of the Chinese economy, the biggest losers were the subcomponents relating to energy goods (-22%) and industrial metals (-14.5%), with precious metals standing out on the positive side (+0.5%).

## **Main Events**

#### **CREATION OF CATEGORY R OF SHARES**

On 4 January 2023 Category R of shares of the IMGA Iberia Equities ESG and IMGA Alocação Defensiva funds was created.

# CREATION OF CATEGORY I OF THE IMGA LIQUIDEZ FUND

On 28 de February 2023 Category I of the IMGA Liquidez fund was created.

# UPDATES TO THE CONSTITUTIVE DOCUMENTS OF THE FUNDS MANAGED BY THE COMPANY

On 17 February 2023, the first annual update of the Prospectuses of the entire IMGA fund offer was completed.

On 9 March, the Prospectuses of the Investment Funds were amended, with the inclusion of an annex with information related to sustainability, within the scope of transparency of sustainable investments in the disclosure of pre-contractual information, as provided for in the Delegated Regulation (EU) 2023/363.

On 15 May, the second mandatory annual update of the constitutive documents of the funds was completed, with the Total Expense Ratio (TER) updated with reference to the year 2022.

# PUBLICATION OF THE REPORTS AND ACCOUNTS OF THE FUNDS MANAGED BY THE COMPANY

On 28 April, the Reports and Accounts of the funds managed by IMGA were published on the CMVM website.

#### **NEW FUNDS:**

#### **IMGA PME Flex**

On 2 January 2023, the IMGA PME Flex fund initiated its activity, with the creation of its Category I.

### IMGA Financial Bonds 3Y, 2,25%, Série I

The marketing of the IMGA Financial Bonds 3Y, 2,25%, Série I fund began on 2 January 2023, and this fund started its activity on 1 February, with the creation of its Category A.

#### **IMGA Financial Bonds 3.5 Y**

The marketing of the IMGA Financial Bonds 3,5Y fund began on 20 March 2023, and this fund started its activity on 1 June, with the creation of its Category A.

#### IMGA Obrigações Globais Euro 2024 – 1ª Série

On 29 June 2023, the creation of the IMGA Obrigações Globais Euro 2024 – 1ª Série was authorised.

## INFORMATION REGARDING SUSTAINABILITY

In the first quarter of 2023, updates were published on the Management Company's website regarding the Sustainability Policy adopted and the document "Information Regarding Sustainability", with the inclusion of an item on due diligence and a summary of the engagement policy.

On 30 June, the "Statement on principal adverse impacts of investment decisions on sustainability factors", relating to the year 2022, was also published.

# **Performance of Equity Funds**

The main equity markets recorded significant gains in the first six months of the year, with a strong echo in investment funds in this category. Investors saw this investment alternative as an ideal support for the growth of their portfolios and benefited from the performance they obtained, with gains exceeding 10% in the vast majority of funds. The improvement in economic conditions, corporate results and the firm message of central banks were, among others, the main drivers of this performance.

Total assets under management for this fund category in Portugal were approximately €3,500m at the end of the first semester, corresponding to a 9% growth compared to December 2022. This category represents approximately 19% of total investment funds managed in Portugal.

In the first 6 months of 2023, IMGA funds in this category showed robust returns, far from those of 2022. At the end of June 2023, the class of equity funds showed positive 12 month returns oscillating between the 12.9% of the IMGA Global Equities Selection fund (Category R) and the 18.8% of the IMGA Iberia Equities - ESG fund (Category I).

This semester, net sales were positive at €46.9m, with a significant part of this growth registered in the IMGA Ações Portugal fund (€20m). The positive effect of the market justified the rest of the growth seen in this category of funds for IMGA, in which assets under management rose from €234.7m in June 2022 to €314m at the end of June 2023, representing 8.1% of IMGA's total.

# Information regarding the Management of the Fund

The North American stock markets presented one of the best semesters on record, with the Nasdaq 100 index recording the best first 6 months ever. The main driver of the markets was the good macroeconomic performance, especially in the USA, where GDP and labor market data showed great resilience.

The two earnings reporting periods were also very positive for stocks, with companies demonstrating a high capacity to pass on rising costs and even manage to expand operating margins. An obvious note for the technological sectors that, riding on the subject of Artificial Intelligence, could even expand the perspective of growth in results. This news gave encouragement to investors who started valuing shares at higher multiples, thus ruling out figures that were more coincident with a phase of the cycle associated with recession.

It should be noted that the high liquidity that investors saved at the beginning of the year, in anticipation of the emergence of a recession, gradually entered the equity market, which provided additional support to stocks.

The aforementioned benign effects outweighed adverse developments, namely the continuation of the war between Russia and Ukraine, the continued rise in interest rates by both the North American Federal Reserve and the ECB and the problems of specific banks, such as SVB in the USA and Credit Suisse in Europe. In fact, the banking sector was the most punished, which contrasted with the good performance of more cyclical sectors such as software, hardware, media, semiconductors and automotive.

IMGA Ações América achieved a positive performance that exceeded that of its reference index, benefiting above all from the selection component in the software, media and retail sectors, where investments in Palo Alto Networks,

Meta Platforms and Costco, respectively, stood out. The allocation component, namely underexposure to sectors with good performances such as media, automobiles and hardware, limited sharper gains.

The Fund started the year with a defensive stance, emphasizing sectors of a defensive nature such as food retail, telecommunications, daily consumer products, and also with an overweight in financial sectors. Conversely, the Fund started 2023 with an underweight in technology and most cyclical sectors. As the year progressed, the initial expectation was that the economy would continue on the recent path of slowdown.

Positions were sold in technological sectors such as Netapp and VMWare and reinforced in healthcare sectors such as Humana and Amgen. As the months went by and the markets improved, positions were reinforced in technological companies that, in our understanding, were trading at attractive multiples, such as Qualcomm, Microsoft, LAM Research and Applied Materials.

The market recovery led to a new rebalancing, considering that some technological companies gained more expensive valuations. Thus, the position in Meta was sold and positions in healthcare sectors with very attractive valuations, such as Pfizer and CVS Health, were reinforced.

At the end of the semester, the Fund had a more neutral position, emphasizing so-called growth sectors, such as software and semiconductors, as well as health sectors, more defensive in nature. Positioning in cyclical sectors remained below the benchmark due to our expectation that the risk of recession has not been fully eradicated.

In June 2023, Category A of the IMGA Ações América fund showed a 1-year return of 13.6% and

an effective 6-month return of 14.6%, having reached a net asset value of €36.6m, 13.1% higher than the €32.4m of December 2022.

Since the beginning of the year, Category A recorded negative net sales of €0.4m, with subscriptions of €2.8m and redemptions of €3.2m.

With regard to category R of the Fund's shares, the 1-year return was 13.5% and the effective 6-month return was 14.6%.

In June 2023, Category I of shares presented a 1-year return of 14.9% and an effective 6-month return of 15.2%, recording a net asset value of €17.4m, significantly higher than the €0.6m recorded in December 2022.

As a capitalization fund, it did not distribute income.

# **Valuation Errors**

Until 30 June 2023, due to errors in the process of valuating the shares of the Collective Investment Undertaking, the Management Company, by way of compensation, paid the amount of €85.54 in favor of the Collective Investment Undertaking. We further inform you that there was no payment of indemnities to affected participants.

# **Subsequent Events**

On 3 July 2023, the marketing of the IMGA Obrigações Globais Euro 2024 – 1º Série fund began.

On 19 July 2023, following the notification to the Comisión Nacional del Mercado de Valores (CNMV) for the marketing, on a cross-border basis, of the IMGA Ações Portugal fund, a letter from CMVM was received informing the Management Company of the registration of that Fund in the Spanish market.

### **INVESTMENT POLICY**

The CIU will seek to provide participants with a level of long-term profitability that incorporates a premium on money market instruments and that roughly reflects the return on the US stock market, by investing in shares of companies listed on the markets of that country, from a perspective of global and diversified allocation, tending to be proportional to the respective market capitalizations. The CIU must permanently hold a minimum of 85% of its net global value invested in shares, mainly of companies listed on the regulated markets of the United States of America (USA) and, complementarily, Canada. The investment policy takes into account the composition of the most representative indices of the North American market and that include its largest and most representative companies in stock market terms, namely the SP500 Index, an index composed of the 500 US companies representing the main industries. The CIU may not invest more than 10% in units of collective investment undertakings. The CIU may use financial derivative instruments for additional exposure without resulting in exposure to the underlying asset exceeding 10% of its net asset value. It may also use financial derivative instruments to hedge share price risk.

The returns presented up to the year 2005 are calculated considering the last price disclosed for the reference dates. For the yields of the following years, the closing prices of the last working day of the beginning and end of the period are considered. Return does not include entry and exit fees. These fees are charged as set out in the prospectus, namely:

Subscription Commission: 0% Redemption Commission: 0%

The disclosed returns represent past data and do not constitute a guarantee of future returns, as the value of the shares may increase or decrease depending on the risk level, which varies between 1 (minimum risk) and 7 (maximum risk).

# Notes to the Financial Statements

Regarding the period ended on 30 June 2023

### **INTRODUCTION**

The incorporation of IMGA Ações América Fundo de Investimento Aberto de Ações (OIC) was authorized by the CMVM (the Portuguese Securities Market Commission) on January 17, 2000, and this Open-ended Equity investment Fund started its activity on that date. It is a Collective Investment Undertaking (CIU), constituted for an indefinite period, and is intended to provide its participants with a level of long-term profitability that incorporates a premium on money market instruments that approximately reflects the profitability of the US stock market. For this purpose, it invests its capital predominantly in shares of companies listed on the regulated markets of the United States of America (USA), taking into account the composition of the most representative indexes of that market, which include its largest and most representative companies in stock market terms, namely the SP500 Index, an index composed of the 500 US companies representing the main industries.

The CIU is administered, managed and represented by IM Gestão de Ativos – Sociedade Gestora de Organismos de Investimento Coletivo, S.A. (Management Company). The functions of depositary bank are performed by Banco Comercial Português, S.A..

The following notes respect the sequential numbering defined in the Chart of Accounts of the Collective Investment Undertakings.

The notes whose numbering is missing are not applicable, or their presentation is not relevant for the reading of the attached Financial Statements.

### 1. CAPITAL OF THE CIU

The capital of the CIU is represented by units of identical content, without par value, called shares, which confer identical rights on their holders. Shares are nominative and adopt the book-entry form. For transaction purposes, shares shall be fractioned to the fourth decimal place.

For the purpose of establishing the CIU, the share value was PTE 1,000 (equivalent to four euros and ninety-nine cents).

The share value for subscription purposes is the value of the share that will be ascertained at the close of the day of the application, which is therefore made at an unknown price.

The share value for the purpose of redemption is the value of the share ascertained at the close of the day of the request, which is therefore made at an unknown price.

During the period ending on 30 June 2023, the movement in the capital of the CIU was the following:

											(Eur)

#### 4. PRESENTATION BASIS AND MAIN ACCOUNTING POLICIES

The Financial Statements were prepared on the basis of the accounting records of the CIU, kept in accordance with the Chart of Accounts for Collective Investment Undertakings, established by the Portuguese Securities Market Commission (CMVM), and complementary regulations issued by this entity, within the scope of its powers assigned by Decree-Law no. 27/2023, of 28 April, which approves the new Asset Management Framework.

The most significant accounting policies used in the preparation of the Financial Statements were the following:

### Accrual basis

The CIU records its income and expenditure on an accrual basis, recognizing them as and when they are generated, regardless of when they are received or paid.

Interest on investments is recorded on a gross basis under the item "Interest and similar income".

### Securities Portfolio and valuation of Shares

a) The share value is calculated daily on business days and is determined by dividing the net asset value of the CIU by the number of outstanding shares. The net asset value of the CIU is calculated by deducting from the sum of the amounts which make up the portfolio the amount of fees and charges up to the moment of portfolio valuation.

- b) The value of the shares will be calculated at 5 PM Lisbon time, this being the reference time for the calculation.
- c) Assets denominated in foreign currency will be valued daily using the exchange rate published by Banco de Portugal and the European Central Bank, with the exception of those assets whose currencies are not listed. In this case, exchange rates published at midday Lisbon time by specialized entities, which are not in a control or group relationship with the Management Company in accordance with Articles 20 and 21 of the Portuguese Securities Code, will be used.
- d) Transactions on securities and derivatives traded for the CIU and confirmed up to the reference time shall count for share valuation purposes on the day of the transaction. Subscriptions and redemptions received on each day (in relation to orders of the previous business day) count for share valuation purposes on that same day.
- e) The valuation of securities and derivative instruments accepted for listing or trading on regulated markets shall be based on the last known price at the reference time; in the absence of price quotation on the day on which the valuation is being made or if such quotation cannot be used, namely because it is considered to be unrepresentative, the last known closing price shall be taken into account, provided such price was published within the 15 days preceding the day on which the valuation is being made.
- f) In the case of debt securities accepted for trading on a regulated market, if the prices charged on the market are not considered representative, may be considered for valuation purposes:
  - a. firm purchase offers or, if these cannot be obtained, the average value of the purchase and sale offers, based on information disclosed by specialized entities, which are not in a control or group relationship with the Management Company, as per Articles 20 and 21 of the Portuguese Securities Code.
- g) When the last price quotation is older than 15 days, securities and derivative instruments are considered unlisted for valuation purposes, and the following paragraph applies.
- h) The valuation of securities and derivative instruments not accepted for listing or trading on regulated markets will be based on the following criteria:
  - a. firm purchase offers or, if these cannot be obtained, the average value of the purchase and sale offers, based on information disclosed by specialized entities, which are not in a control or group relationship with the Management Company, as per Articles 20 and 21 of the Portuguese Securities Code;
  - b. theoretical valuation models, which the Management Company deems more appropriate in view of the characteristics of the asset or derivative instrument; the valuation may be performed by a subcontracted entity.
- i) Amounts representing short-term debt shall be valued based on the daily recognition of interest inherent to the operation.
- j) The FIFO criteria is used to determine the cost of securities sold.

### <u>Taxation</u>

The tax regime applicable to collective investment undertakings (established by Decree-Law No. 7/2015, of January 13) is based on a method of taxation of "exit" income, that is, taxation is essentially in the sphere of the participants.

Even so, the CIU is subject to the general corporate income tax rate on its net income calculated in each year, expunged, however, of the income (and respective associated expenses) from capital, property and capital gains, as qualified for Personal Income Tax (provided that such income does not come from entities resident

or domiciled in a country, territory or region subject to a clearly more favorable tax regime included in the list approved by ordinance of the member of the Government responsible for the area of finance, in which case they will be taxed). Income, including discounts, and expenses related to management fees and other fees payable to securities investment funds, as well as non-deductible expenses provided for in article 23rd – A of the IRC – Corporate Income Tax Code, will likewise be considered irrelevant for purposes of determining taxable income.

Regarding Stamp Duty, Funds are subject to this tax on their net asset value at a rate of 0.0125%, per quarter.

Since 1 January 2019, management and deposit fees borne by the Fund and subscription and reimbursement fees borne by participants have been subject to stamp duty at a rate of 4%.

#### 11. EXPOSURE TO FOREIGN EXCHANGE RISK

As at 30 June 2023, the foreign exchange positions held by the CIU can be summarized as follows:

Currency	Spot		Term							
Currency	эрог	Forward	Futures	Swaps	Options	Total Term	Global Position			
CAD	38 028	-	-	-	-	-	38 028			
GBP	43 268	-	-	-	-	-	43 268			
USD	16 819 599	-	-	-	-	-	16 819 599			
Total in Euro	15 555 901	-	-	-	-	-	15 555 901			

#### 13. EXPOSURE TO PRICE RISK

As at 30 June 2023, price risk exposure can be summarized as follows:

				(Eur)	
Shares and similar securities	Portolio value	Off-balance sheet		Total	
		Futures	Options	TOTAL	
Shares	52 615 011	-	-	52 615 011	

#### **15. ASCRIBED COSTS**

The costs ascribed to the CIU during the period ending on 30 June 2023 have the following composition:

						(Eur)	
Expenses	Categ	Category A		Category I		Category R	
	Value	%NAV (1)	Value	%NAV (1)	Value	%NAV (1)	
Management fee	385 538	1,12%	44 476	0,53%	166	1,18%	
Deposit fee	13 349	0,04%	3 217	0,04%	5	0,04%	
Supervision tax	2 513	0,01%	625	0,01%	1	0,01%	
Audit expenses	1 228	0,00%	296	0,00%	1	0,00%	
Stamp duty on the value of the OIC	8 776	0,03%	2 115	0,03%	4	0,03%	
Other expenses	529	0,00%	128	0,00%	0	0,00%	
TOTAL	411 933		50 856		177		
TOTAL EXPENSE RATIO	1,1	1,19%		0,61%		1,25%	

(1) Average for the period

The presentation of Note 15 of the Notes to the financial statements has been, from the current period, changed in order to detail the costs incurred by the CIU in accordance with the presentation made in the respective prospectus (thus showing greater detail than that required by Regulation No. 16 /2003).

## Report on the audit of the financial statements

### **Opinion**

We have audited the accompanying financial statements of IMGA Ações América – Fundo de Investimento Aberto de Ações (the "Fund") managed by IM Gestão de Ativos – Sociedade Gestora de Organismos de Investimento Coletivo, S.A. ("Management Company"), which comprise the statement of financial position as at June 30, 2023 (showing a total of 54 129 632 euros and a total net equity of 53 993 201 euros, including a net income of 6 199 131 euros), the income statement by nature, the statement of cash flows for the 6 months period then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view, in all material respects, of the financial position of IMGA Ações América – Fundo de Investimento Aberto de Ações managed by IM Gestão de Ativos – Sociedade Gestora de Organismos de Investimento Coletivo, S.A. as at June 30, 2023, and of its financial performance and its cash flows for the 6 months period then ended in accordance with generally accepted accounting principles in Portugal for investment funds.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs) and further technical and ethical standards and guidelines as issued by "Ordem dos Revisores Oficiais de Contas" (the Portuguese Institute of Statutory Auditors). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section below. We are independent from the Fund in accordance with the law and we have fulfilled other ethical requirements in accordance with the "Ordem dos Revisores Oficiais de Contas" code of ethics.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# Responsibilities of the board of directors and the supervisory body of the Management Company for the financial statements

The board of directors of Management Company is responsible for:

- the preparation of financial statements that give a true and fair view of the Fund financial position, financial performance and cash flows in accordance with generally accepted accounting principles in Portugal for investment funds;
- the preparation of the management report in accordance with applicable laws and regulations;
- designing and maintaining an appropriate internal control system to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error;
- the adoption of accounting policies and principles appropriate in the circumstances; and

### mazars

assessing the Fund ability to continue as a going concern, and disclosing, as applicable, the matters that may cast significant doubt about the Fund ability to continue as a going concern.

The supervisory body of the Management Company is responsible for overseeing the Fund financial reporting process.

### Auditor's Responsibilities for the Audit of the Financial Statements

Our responsibility is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken based on these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether
  due to fraud or error, design and perform audit procedures responsive to those risks, and
  obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The
  risk of not detecting a material misstatement resulting from fraud is higher than for one
  resulting from error, as fraud may involve collusion, forgery, intentional omissions,
  misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing
  an opinion on the effectiveness of the Management Company internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by board of directors of the Management Company;
- conclude on the appropriateness of board of directors of the Management Company use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Management Company to cease the Fund to continue as a going concern;
- evaluate the overall presentation, structure, and content of the financial statements, including
  the disclosures, and whether the financial statements represent the underlying transactions
  and events in a manner that achieves fair presentation; and
- communicate with those charged with governance, including the supervisory body of the Management Company, regarding, among other matters, the planned scope and timing of the

### mazars

audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Our responsibility also includes the verification that the information contained in the management report is consistent with the financial statements.

## Report on other legal regulatory requirements

## On the management report

Is our opinion that the management report was prepared in accordance with the applicable legal and regulatory requirements and the information contained therein is consistent with the audited financial statements and, having regard to our knowledge and assessment over the Fund, we have not identified any material misstatements.
