## IMGA PME Flex – Open-Ended Alternative Fund

Unit Class P (ISIN PTIG1VHM0001)

Unit Class I (ISIN PTIG1UHM0002)

Non-harmonised Fund managed by **IM Gestão de Ativos – Managing Company of Collective Investment Entities, S.A.**, held by the CIMD Group.

### Objectives and investment policy

#### Objectives

The FUND aims to provide unit-holders with half-yearly distribution of income and a growth in the capital invested through an investment mainly made in short-term debt instruments of Portuguese SME's, selected in accordance with predefined risk parameters and models and with a potential for profitability greater than the market interest rates.

#### Investment Policy

The Fund will invest mainly in short-term debt instruments of Portuguese SMEs. The FUND may invest up to 40% of its net asset value in debt instruments of other Portuguese issuers that do not qualify as SME's.

The FUND will seek to manage the respective credit risk with to the intended purpose of providing its unit-holders with an average return which incorporates a premium pertaining to the market interest rates, being able to invest in issuers with a credit risk rating lower than "investment grade".

The FUND can invest up to 25% of its total net asset value in debt with a short-term internal credit risk rating equivalent to "B" or "B-2" of the agencies Fitch and S&P, respectively, with this being the minimum credit risk to be assumed by the FUND.

The FUND may invest up to 10% of its total net asset value in units of collective investment institutions, including collective investment institutions managed by IM Gestão de Ativos.

The FUND may invest up to 100% of the debt securities of the same issuer.

The FUND shall not be exposed to exchange risk.

The investment strategy of the Fund follows an active management approach, without considering any benchmark parameters. Assets are selected from the list of issuers mentioned above, essentially considering their return potential relative to their quality in terms of credit risk and the macroeconomic context in which they operate.

### Risk and reward profile

#### Synthetic risk indicator

The shaded area of the scale below shows the Fund's risk rating, calculated based on historical data.

The risk category indicated is not guaranteed and may vary over time. The lowest category does not mean the investment is without risk.

The fund classification reflects the fact that it is mainly invested in bonds, and therefore it does not offer a fixed or guaranteed return, therefore the investor is exposed to the various risks mentioned below, which may entail a risk of capital loss, i.e. they may not recover their investment in full.

#### Description of materially relevant risks:

##### Credit Risk

The FUND is exposed to market risk arising from the sensitivity of the price of the assets to fluctuations in the probability of the issuer of a security not managing to comply in due time with its obligations to make payments of interest and capital.

##### Interest Rate Risk

The FUND is exposed to the interest rate risk resulting from the change in the price of the fixed-rate bonds owing to fluctuations in the market interest rates.

The synthetic risk and returns indicator is obtained by calculating the historical volatility of the last five years.

As the UCI do not have any history, the risk level was calculated taking into account proxies, in other words, the most relevant indices for the investment universe foreseen in the investment policy.

### Liquidity Risk

The FUND may find it difficult to value or meet high-volume redemption requests if some of its investments become illiquid or do not permit their sale at fair prices.

### Counterparty Risk

The Fund is exposed to counterparty risk arising from the possibility of the counterparty in a transaction becoming unable to meet its commitments to deliver the financial instrument or monetary values on the settlement date, forcing the transaction to be concluded at a price different from that agreed.

## Charges

The charges borne by the investor are used to cover the Fund's operating costs, including marketing and distribution costs. These charges reduce the investment's growth potential.
